

Detoxacream®

Detoxacream 16oz. Pump Bottle

PRIMARY BENEFITS:

Detoxacream is an EDTA Chelation wellness therapy cream that safely removes lead from your body with a lower dose formula. By using a constant, low-strength dosage, it provides the body the ability to continuously purge toxic lead from your body. It's scentless with no fillers or dyes. Detoxacream is proudly manufactured in the U.S. in an FDA registered facility and has the Good Manufacturing Practices (GMP) seal for quality products. Detoxacream is easy to use, effective, and safe for all ages.

ACTIVE & IN-ACTIVE INGREDIENTS:

Active ingredient:

Calcium Disodium EDTA (Ethylenediaminetetraacetic acid)

Inactive ingredients: Water, glycerin, jojoba oil, shea butter, mango butter, and emulsifiers. Contains no perfumes, no fillers and no dyes.

These statements have not been evaluated by the FDA and are not intended to diagnose, treat or cure any disease. Always check with your physician before starting a new botanical extract, medicinal herb, or dietary supplement program.

2021 PRODUCT SHEET

PRODUCT DESCRIPTION:

Toxic heavy metals like lead are everywhere. They are in the air, homes, workplace, water, food, schools and are unavoidable. Most people do not realize that the human body does not have an adequate mechanism to remove heavy metals like lead. Disodium Calcium EDTA Chelation therapy is a proven process to remove lead from the body. Instead of the traditional high dose treatments like I.V. or suppositories, Detoxacream's lower dose EDTA wellness moisturizing cream allows people of all ages to effectively incorporate EDTA chelation therapy into their daily routine providing less long-term health issues associated with toxic lead and heavy metals.

DIRECTIONS FOR USE:

Apply 4 pumps of cream to a thin-skinned area of the body such as inner arms, side of torso, inner thigh or upper chest. You will know the cream has been absorbed when the color changes from white to clear. It may be easier to apply one pump at a time, too much cream at once can saturate the skin making it more difficult to absorb.

Suggested use: Use 4 pumps daily for 5 days with 2 days off. It is recommended to clean the area of skin where you will be applying Detoxacream.

PRECAUTIONS:

There are a few things to keep in mind when starting, using, and finishing your EDTA Chelation therapy treatment. EDTA Chelation removes toxic lead & heavy metals but also removes some minerals your body needs. This requires you to take a supplementary mineral supplement to replace the good minerals taken out.

To aid in this, we have a quality mineral supplement available but most over the counter supplement are acceptable. This must be part of your therapy to insure maximum results. EDTA Chelation is not a one-time treatment or cure. At a minimum, you must use Detoxacream for 3-6 months to achieve desired results. Because everyone is exposed to heavy metals on a daily-basis, EDTA Chelation therapy should be viewed as an annual routine and ultimately as you get older, a daily-routine.

Warning: Remove the tamper seal before using. Do not use if tamper seal has been broken. Keep away from children, do not use if pregnant or nursing, or have sensitive skin.
